

Action on Cuba Is Put Off

WASHINGTON, Sept. 14 (AP)—President Kennedy says U. S. military action against Cuba is not now required or justified. But he told his news conference Thursday that if the United States should ever have to take action, "all of Castro's oil and sugar supplies and other commodities would not change one iota or significantly extend the time required to remove the threat."

At the same time, the President admonished critics writing that the United States is not doing enough to fight the communist threat against the United States.

He said he finds it "regrettable" that he has to talk about such action in this country might serve to give a thin column of testimony to the communist press that this is a threat.

The President said, as he has said before, that Cuba poses no threat to the Western Hemisphere.

He said the Castro regime—with Russian backing—endanger the security of the United States and that the United States will do whatever must be done to protect its own security and that of its allies. He said.

He said the United States will intensify its watch over the Caribbean area. But he said Washington is aware of what goes on in Cuba and is fully capable of dealing with any such threat.

Kennedy opened the nationally televised news conference by saying that the United States is not now required or justified in taking military action against Cuba.

He said the United States is not now required or justified in taking military action against Cuba.

Magic Valley Medics Consider Report of Canadian Polio Cases

Magic Valley medical authorities Friday were reconsidering Sabin oral polio vaccine clinics scheduled for later this month in the light of Canadian authorities suspending similar programs because four persons developed paralysis after taking the vaccine. In Jerome, Alan Mencher, co-publisher of the North Side News, talked with the U. S. surgeon general's office Friday morning and learned that the vaccine is not scheduled to meet until Oct. 27, is holding an emergency meeting at 9 a.m. Saturday to discuss the problem.

The method of administering Sabin vaccine in Canada is different from the U. S. in that all three doses are combined into one. Mencher quoted Mrs. Marjorie Cunningham as saying she is an assistant to Surgeon General Luther Terry.

She also said that the method of manufacturing the vaccine is different from standards set up in the U. S. by the health department. Sabin oral vaccine clinics are scheduled in Magic Valley Sept. 23-25.

Francis Brochard, Magic Valley medical director, said that the U. S. health department is not now required or justified in taking military action against Cuba.

He said the United States is not now required or justified in taking military action against Cuba.

Truman Arrives to Aid State Demos

IDAHO FALLS, Sept. 14 (UPI)—Former President Harry S. Truman, 78, arrived here at 12:01 p.m. today by private plane to conduct a one-day campaign for Idaho Democrats running for congress. About 250 persons, some of them waving "Welcome Harry" signs, greeted the smiling, hatless ex-President as he stepped from a two-engine Lockheed Lodestar aircraft owned by Gov. Edmund G. Brown of California.

Truman told the plane by Rep. Ralph R. Harding, D., Idaho, and Sen. Frank Church, D., Idaho.

Truman told the crowd "I'm proud to be here. I've been here before and I think it did some good when I came and I hope it will this time, I'll try."

He hoped his trip here will be of some benefit to everyone, but to the Democrats more than anyone else, Truman said.

At Truman stepped from the plane, the 90-piece Idaho Falls high school band serenaded him with "Happy Days Are Here Again" and the "Marching Waltz."

Truman then was taken by motorcycle through downtown Idaho Falls to address a rally which will open the campaign office here of Charles E. Blackwell.

The former president's Idaho trip is one of 15 from Connecticut to California. He will visit 14 outposts. Truman is making to address similar dinners honoring his campaign.

Truman will also stop for a scheduled 15 minutes at the Idaho State Fairgrounds, where he will address a rally which will open the campaign office here of Charles E. Blackwell.

Truman will confer with the congressional members during the afternoon. He will appear on a half hour telecast beamed at Moscow, Idaho, at 7 p.m. and leave for Pocatello.

Candidates for state and local offices will be present at the dinner and the functions attended by Truman, Benton said, but he did not say whether he will take time to see them.

At St. Paul, Minn., a small number of NPO members were reported by police to be milling around the livestock yards, checking trucks and receipts.

The senate today put aside a mid-day report showed a lower trend in cattle and hog prices, with hogs steady at cents lower and cattle 25 to 75 cents lower at Chicago.

One of the big meat packers, Wilson and company, today announced it was resuming normal operations because of the increase in meat supplies during the past week.

Crash Injury Is Fatal for Buhl Woman

CALEDWELL, Sept. 14 (UPI)—A Buhl woman died here Thursday as the result of injuries suffered in a train-car collision week ago.

Mrs. Josephine Porter Hawkins, 71, was a passenger in the car driven by her husband, Will B. Hawkins. He was displaced from the Caldwell hospital Wednesday.

The car collided with the engine of the Union-Pacific Railroad "Emmett local" on U. S. highway 29, five miles east of Caldwell. Hawkins told officers he did not see the train because of the morning sun in his eyes.

The death boosted Idaho's 1962 traffic death toll to 161, eight more than at this time a year ago.

Mother of 4 Killed In Road Accident

BURLEY, Sept. 14—The wife of a Mountain Home air force officer and mother of four children was killed Thursday night 21 miles east of Rupert on interstate highway 80N in a one-car accident. Mrs. Ila M. Mason, 37, was pronounced dead on arrival at Cassia Memorial hospital shortly after midnight. According to State Patrolmen Charles Peugh and Roy Thomas, investigating officers, Mrs. Mason was following her husband, S/Sgt. James Mason, who was in another car ahead of her.

There were two children in the car, and the family was returning to Mountain Home, where he has been stationed the last 10 years. Mrs. Mason, Indiana, Sergeant Mason told officers the only explanation for the accident is that his wife was tired.

The West had no sure indication that the Russians were really serious about negotiating, but the fact that they remained here to talk was taken as at least a plus sign.

The three nations are meeting as the nuclear subcommittee of the 17-nation disarmament conference.

The conference itself is in adjournment at least until mid-November, having failed to make any substantial progress toward general disarmament.

At the urging of the United States and Britain the Soviet Union reluctantly agreed to continue the subcommittee talks during the recess.

They said they would not continue their bargaining position, but the West hoped the quieter atmosphere would be more conducive to real bargaining.

Forest Fires Under Attack In Two States

By United Press International
Reinforced firefighters made an all-out, unrelenting today on two forest fires burning out of control in Colorado and Wyoming. Officials directing the firefighting operations expressed hope they would be able to contain the blazes during the day.

The largest of the two fires was spreading over the eastern slope of 14,200-foot Mt. Evans, some 40 miles west of Denver. The fire broke out Wednesday and by early today it had burned over only an estimated 100 acres of valuable timber in Shoshone national forest.

The Wyoming fire, near Laramie, broke out the same day but had burned over only an estimated 100 acres of valuable timber in Shoshone national forest.

The Wyoming fire, near Laramie, broke out the same day but had burned over only an estimated 100 acres of valuable timber in Shoshone national forest.

15 T.F. Offices Hit by Burglars

The theft of \$800 to \$900 Thursday evening and early Friday morning from 15 Twin Falls business and professional offices, including 13 doctors' offices, was the latest in a series of burglaries in Twin Falls. Chief of city detectives, Lee Tinkling, said Friday noon that there are no apparent suspects and that the investigation had reached a point where "we're just making out reports."

Largest single theft in the series of break-ins was \$498.50 from a S&W at Sneed-Keely Oldsmobile car repair shop. Smaller amounts of money and an unknown amount of narcotics were taken from 11 doctors in the Magic Valley Medical center, 616 Shoshone street, west, behind Magic Valley Memorial hospital, and two downtown Twin Falls doctors' offices were also entered.

G. P. Wuester, 204 Fourth street, east, one of the two downtown doctors' offices entered, said an estimated \$50 to \$100 was taken from his office. No drugs were taken.

An insurance office, above Pateran Pharmacy company, 160 Shoshone street east, was also broken into, but nothing was taken.

Offices in the large medical center were easily reached by the burglar after gaining entry to the medical building. Narcotics were taken from the offices of Dr. E. C. Carter and Dr. Wayne Schuler.

Medical center officials broke into 10, including Dr. E. C. Katz, who took \$14.50 was taken and a safe was wrecked. Dr. E. M. (Continued on Page 2, Column 4)

Brazilian Cabinet, Minister Quit Post

BRASILIA, Brazil, Sept. 14 (P)—Prime Minister Francisco Brochado Da Rocha and his cabinet resigned today after failing to get a wrangling congress to approve a referendum to give full executive powers to President Joao Goulart. The cabinet's resignation forced four of the military congress to give full executive powers to Goulart—Brochado Da Rocha told the chamber of deputies he was quitting after two months because the conservative bloc in congress had stubbornly resisted his efforts to win approval for Goulart's demands.

With elections for a new congress only a few weeks off, the cabinet's departure seemed certain to force Brochado Da Rocha into a political and financial difficulties.

Goulart, whose relations with Congress have worsened steadily over his drive for the powers taken from his office last year, was given little chance of finding a new prime minister who could win approval of the balky congress.

The president's office was reduced to a figurehead in a parliamentary system set up in a military crisis last year. Congress refused to enact emergency reforms he demanded, and he sought a plebiscite during next month's elections to endorse a return to the former presidential system.

The withdrawal of Brochado Da Rocha made it final appeal to Congress to give the people the right which was taken away from them.

The armed guard about Congress was doubled as about 150 workers from the Congress demonstrated outside. There was no violence.

Cuba Promises to Free Newsmen

LONDON, Sept. 14 (AP)—The Cuban authorities had promised to release "within a few days" the two British newsmen arrested earlier this week.

A spokesman said the foreign office in Havana has informed the British government of the intention.

No reasons have been given for the arrest of the two British newsmen, John Burt Foster and John G. Bennett, who were arrested in Havana, and John Bennett, Newswatch's correspondent.

Leader Vows Katanga Will Remain True

ELIZABETHTOWN, Katanga, the Congo, Sept. 14 (UPI)—President Joseph Kasavubu today declared "Katanga remains true to the line he has chosen—but he left up in the air whether he will go along with the United Nations plan to unify the Congo.

In a shouting speech at the burial of two Congolese soldiers who were killed during a clash with U. N. troops here Wednesday, Kasavubu declared that his people are "revolted by repeated provocations" and warned any her provocation would result in violence.

The suspicion grew among U. N. officials that Kasavubu was raising his voice against the United Nations plan to unify the Congo.

Everybody's Money

By MERVILLE STANLEY

The current party efforts to collect support from voters in the November congressional elections is in keeping with the philosophy of a competitive national economy, which rests on securing an optimum degree of free choice to the individual citizen.

Prior to the day of the new deal, an unprejudiced examination of the annals of business in the 45-year interim following the civil war demonstrated that neither major party had a monopoly of being associated with periods of prosperity and growth.

It is not as if, in any case, there is this year the issue of restoring confidence in markets, which was primarily among the critically important decision-makers in industry and finance who have shown caution in forward plans affecting new capital investments, on the one hand, and inventory accumulation, on the other.

Since April, President Kennedy has sought to mend fences, and lay the basis for reducing hostility from business quarters. And in the spirit of public relations, spokesmen for even the harshest steel industry have spoken words in favor of better cooperation with industry with government.

But words are not enough to convert doubts into hope. Even when strong decisions from administration circles in an election year are viewed with some skepticism, greater optimism, which long term plans for expansion can be launched? The first factor

"OKLAHOMA!" MUSICAL SCORE for the fifth annual Dilettante production is discussed by, from left, Beverly Kitch, Twin Falls choreographer; H. Paul Kille, Dilettante director; and Roger Vincent, Kille, chorus director. Ole Miss Mix-Order Turned Down

JACKSON, Miss., Sept. 14 (UP)—Gov. Ross Barnett has ordered Mississippi officials to deny a federal court order to desegregate the University of Mississippi.

Describing efforts to integrate the university as Mississippi's greatest crisis since the Civil war, the 64-year-old governor said Thursday night he preferred jail to submission to the "tyranny of judicial oppression."

He called for the resignation of any state official not prepared to go all the way rather than submit to the court order.

In solemn tones, Barnett told a statewide television-radio audience that Mississippi schools "will not be closed if this can possibly be avoided, but they will not be integrated."

Barnett acted after a ruling by U.S. Supreme Court Justice Hugo Black cleared the way for James H. Meredith, a Negro, to enter the university next week.

Meredith, 26, reportedly was out of the state and unable for comment.

Mississippi is "one of three states which have no integration in public education facilities, Alabama and South Carolina are the others."

During his 20-minute talk, the governor issued a proclamation to the sovereignty of Mississippi and the federal government and asked public schools and colleges to "avoid devices which are an interference."

Navy Keeps Watch on Cuba Supply

WASHINGTON, Sept. 14 (UP)—The navy says its ships and planes are keeping a sharp eye on Cuba and its supply lines—all the way from European ports to Fidel Castro's doorstep.

Apparently they are in position to keep an "even closer" watch whenever the navy's ships and planes are alerted to the flow of communist arms and supplies into the island.

President Kennedy told his news conference Thursday the flow of communist arms and supplies into the island will be met by increased American "surveillance of the whole Caribbean area."

The president did not spell out what had been done or what he had in mind.

However, navy sources said later that there has been a step-up in aerial surveillance of Cuba in the last three weeks. They added that all of the navy's resources, starting in European ports, are being used to watch Cuba's territorial limits, have been thrown into a constant watch that will be intensified if further notification from the White House.

Navy sources said that for many months patrol planes have been operating, virtually around the clock, from Key West, Fla., and the U.S. base at Guantanamo Bay, Cuba.

Burton vessels—principally destroyers—are operating night and day from Roosevelt Roads, Puerto Rico, Guantanamo Bay and Key West, the sources said.

They said American officials and agents check ports "everywhere in Europe" on ships reported to be bound, or suspected to be bound, for Cuba.

Air force sources said any ship leaving "anywhere in Europe for Cuba" is known before it would leave port.

The same apparently is true of the air lines. The defense department said Thursday communist bloc flights to Cuba are followed and are well-known—by U.S. authorities.

Booster Night Set for Grange

KING HILL, Sept. 14—Booster night for King Hill Grangers will be held Sept. 22, Mrs. Thomas Timbers, lecturer, announced at a meeting Thursday night.

Mrs. Lawrence Washington, Hazelton, will be guest speaker and show slides of the Holy Land. The Grange members bringing the great guests will win a prize.

Master Carl Anderson reported on the materials to be used on repairing the roof on the Grange hall. Arthur Greer reported on hay and crop insurance.

Mrs. William Cain read a letter from Korea, asking for donations to help build an orphanage and \$5 was contributed. Potomac Grange meeting will be held at the local hall Oct. 2.

William Cain, community service chairman, urged that work begin on the King Hill park. He said he will contact persons who can help with the project after Oct. 15. It was decided the Grange meeting will start at 8 p.m. during the winter months instead of 8:30 p.m.

Mrs. Timbers asked members to describe their vacations. Resolutions were acted by Mrs. C. E. Spence and Mrs. Cecil Dett.

ACTOR ILL
SANTA MONICA, Calif., Sept. 14 (AP)—Actor-producer Dick Powell, 57, in St. John's hospital for treatment of an allergy that caused him to break out in hives, doctors said. He was expected to stay in the hospital several days.

News Around Idaho

MOSCOW, IDAHO, Sept. 14 (UP)—Low bid for construction of a new physical science building, an addition to the other plant, machine shop and a heating plant, owned at the University of Idaho, H. Halvorsen, Inc., of Spokane, Wash., bid \$22,717 for general construction of the physical science building. Low bid for mechanical work on the building, \$44,496, was by Benjamin Plumbing and Heating company, Idaho Falls; for electrical work, \$12,225, by C. J. Kleiter, Spokane; and for carpentry, \$24,378, Draka Plumbing, Boise. Vern W. Johnson and Son, Spokane, submitted a low bid of \$115,764 for general construction of the boiler plant. Low bid of mechanical work was \$23,737 by Bresina Construction company, Salt Lake City.

BOISE, Sept. 14 (UP)—Respectful of Dr. Paul Zilla, Wallace as a member of the state board of health was announced today by Gov. Robert E. Smylie. Dr. Zilla has served as a member and chairman of the board since it was organized in 1957. His new appointment is to a second five-year term, subject to ratification by the state senate at its next session. The term runs until Sept. 13, 1967. Dr. Zilla was reappointed by Governor B. Hagedorn of Coeur d'Alene as a member of the North Idaho Junior College Dormitory Housing Commission for a three-year term running until June 16, 1965.

POCAHELLO, Sept. 14 (UP)—A 20-year-old man fingered a little too long in Pocahellico Thursday afternoon, and as a result, he is being held today to face bad check charges here and at Bismarck, Mont. The Pocahellico police department was notified Thursday that had 20 checks were taken at three local stores. While attempts were being made to find the man, a report came in from one of the stores that the man had returned and was being held. The man, Ronald E. Heret, was arrested. He had fled from Montana, Oregon, Washington and Idaho. He said he was planning to leave immediately for Utah, but stopped back at the store to purchase a few for "the trip"—beer, candy and a half, and he would have been in Utah," he said. He told questioning officers that he considered Idaho Falls the "hardest town" of any city he had been in.

BOISE, Sept. 14 (UP)—Predictions of Idaho's fall potato crop remained unchanged during August, but the U. S. department of agriculture said today freezing weather this month may have cut the yield. The forecast as of Sept. 1 was 49.8 million hundredweight, compared with 1961 production of 50,000,000 hundredweight. The expected yield per acre as of Sept. 1 was 200 hundredweight compared with 210 last year. The department said, however, that the crop was maturing 10 days to two weeks later than usual and needed frost-free weather through Sept. 20 to reach normal size. "Frost of varying degree hit much of the area in the eastern section, north of the river in the Snake Valley and in the Malheur area on Sept. 8 and 9," the department said.

Paul Grange Gives Coombs Farmer Title

PAUL, Sept. 14 (UP)—Lynn Coombs was nominated Farmer of the Year for the Minidoka county project at the Paul "Grange" meeting Wednesday night.

Also discussed was the present community service project, the numbering of houses and streets in Paul. Nothing further can be done in this matter until a map showing lots and streets is obtained, it was reported.

Entries in the home-economic date contest were shown and judged. Mrs. Gerald Schneider's entry was chosen to go to state in the youth division, a waders apron made by May Stuart won and Ricketty Stuart was given first with his entry of things made from projects at school. An edging which will be entered in the national edging contest, was shown by Mrs. Monte City Moore.

Honorees were Mrs. Thelma Stewart and Mrs. Marie Francisco. It was announced that their next meeting will be a special one for the Grange of Minidoka county will meet Sept. 26 at the Pioneer Grange hall for the Pomona meeting.

Slight Error In Bad Weather Helps Convict

ST. PETERSBURG, Fla., Sept. 14 (UP)—The weather began to look threatening. The formation of a prison road detail hurried his brother, Darrell, sophomore student at the University of Idaho on a sustaining basis for the four year term.

Both are graduates of Richfield high school and were students body presidents during their senior years and were class valedictorians. Both have been active in the Methodist church and held district and sub-district.

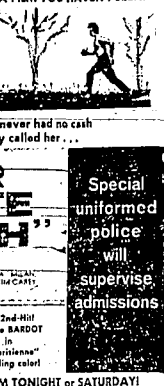

Warden Lynwood Watts said Darrell, a transfer, has 90 days to arrive—but he'll get more good time off for this.

Along Fences and Canals

The A.C. Howells are busy this week threatening potato and white beans on their ranch southeast of Buhl. The crop looks very good so far.

Activity at the Frank Herzinger ranch five and one-half miles south of Buhl includes constructing a new three acre broom barn. At the present time the basement has been dug and a circular foundation has been laid, reports Mrs. Herzinger.

Frost reports have been posted in Hagerman valley, with damage to numerous plants, noted in Hagerman by Mrs. Charles Klier.

Hold corn has had a rough time making it this year because of the cool weather, and now frost has hampered growth further. James Lamb, southwest of Hagerman reports frost damage has set down his field, and says other fields have been noted.

K. E. McKendrick and Ervin Braun, north Shoshone, sold his lamb Monday at the Shoshone sale yards.

Georgy Moody, north Shoshone, has one field, 15 acres, of beans ready for harvest and he is cutting them this week.

Mr. and Mrs. Don Rowe and daughters have moved from their home in northwest Shoshone to Nampa where he will manage a general store. Elmer Hechler will be farming the Rowe farm in south Shoshone next summer. Mr. and Mrs. Gale Welch, near south Shoshone, N.E.O., are living in the Rowe home. Welch and his family, Valentin, N.E.O., are living in the Rowe home. Welch and his family, Valentin, N.E.O., are living in the Rowe home.

Mr. and Mrs. Elmer Jones and family have moved into the Don Cox farm, home 10 miles northwest of Shoshone. They recently lived in Gooding, Jones farms in the northwest Shoshone area.

Farmers in the Almo area are finishing harvesting their grain this week. Despite the late planting and late summer water shortage, there has been a fairly good yield.

Walter Rice, Almo farmer, cut his third crop of alfalfa Saturday. He was one of the fortunate ones as the frost Saturday night did considerable damage to the hay in the Almo area. Orders were also damaged.

Travis McCool, Almo, is painting the farm home of Mr. and Mrs. Dwayne Ward.

Mr. and Mrs. Charles Kest are at Fairfield this week making arrangements to drive their cattle to their King Hill ranch for winter feeding. Their son and daughter-in-law, Mr. and Mrs. Michael Kest, ran the Fairfield ranch during the summer months.

Oliver Lowry, north Shoshone farmer, feels he passed the obstacle for the other night. With his small son, Randy, in one arm and a bucket of milk in the other, he headed for the house from the barn. It was too dark, or his eyes hadn't adjusted to the darkness after the light from the barn, and he ran into a cow lying on the ground in the corral. He didn't drop the boy, the cow didn't bite him while his hand was milking and had curled up in a corner and gone to sleep. Lowry decided not to awaken him which accounts for the extra load on his arm.

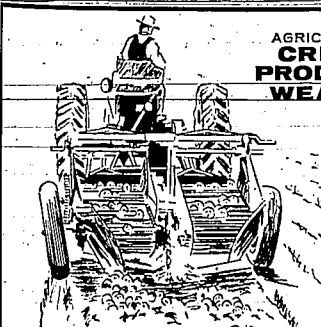

Harvest yield reported so far on dry land winter wheat is in the Corral section where five acres owned by Herman Miller and owned by Neil Wolfe produced 52 bushels to the acre. Marnie Ears, also in the Corral section, had 25 acres that yielded 50 bushels to the acre. Both fields were on land that had been plowed out of alfalfa.

Manuel Patterson, Gooding, is building a herder's shack on one of his range land near Little Smokey creek, north of Fair-

Fats, Oils Moving at Record Rate

WASHINGTON, Sept. 14 (AP)—Fats, oils, and oilseeds for oil equivalents are moving into world markets at a record rate. The foreign agriculture service says on the basis of the current forecast of 9.4 million tons, oil exports exceed the 1961 average by six per cent and the 1960-64 average by almost one-half.

The estimated \$500,000-ton increase in exports this year is due almost entirely to the sharp increase in the movement of oilseed vegetable oils. Marine oil exports probably will increase 20 per cent, but exports of animal fats are not expected to change significantly from last year's level.

Plant a potato and forget it... That's no way to make a crop. It takes human resourcefulness, equipment, methods and money to produce wealth from the land.

In the development of your land resources through credit which produces wealth, your Production Credit Association office is ready to assist you with financial planning, improved methods, and cash for operating expenses when you need it.

It is through the use of credit for production—quickly obtainable at your nearby PCA—that American farmers and ranchers produce the food and fiber that keeps our nation strong, busy, and well-fed.

Times News Farm AND Ranch SECTION

ENHANCING A HILL OF POTATOES after the frost hit last week-end is Morris Lattimer, northeast of Magic Valley. Frost kill was extensive in the Mini-Cassia area and spotty in the western section of Magic Valley. Some damage was done to beans and corn. Frost damage could curtail yield. (Times-News photo)

Frost Damage Beginning To Take Toll of Crops

Early frost is hastening the maturing of spuds and in some places has hurt the bean crop. Most of the serious frost damage experienced thus far has been in the areas around Murtough, Richfield and further east to the Mini-Cassia area.

Smudge pots were lighted on Richfield farms for the first time ever Saturday afternoon, as farmers sought to avoid crop damage from the spotty, mild frost.

With the temperature falling to 22 degrees, Donald Walker and his son Ernest prepared for the cold wave Saturday about 2:30 p.m. when they made smudge pots of baled straw and hay soaked in water then covered with diesel oil and a little gasoline.

They protected 60 acres of alfalfa seed and 22 acres of beans were cut and in windows. Between 5 and 6 a.m., S. J. Fifer flew his plane over Walker's

bean crop in the Murtough area was cut and "windrowed" when the frost struck. Many farmers have taken a wait and see attitude concerning beans.

According to Twin Falls county agent Donald Youitz, the damage ranged from very light in the county near the Knoll area, to fairly heavy near Murtough. The thing that has hurt beans more than anything else is the late start. This late start coupled with early frost might cut into production and yield.

"The real villain was our late

spring and early rains," says Youitz.

Many potato vines are down in the area from Murtough to Oakley. Frost south of Murtough was less-severe—killing some farms hard and missing fields just across the road.

Should frost continue it could curtail the size of late potatoes. Some early potato harvesting has begun and the bulk of early potato harvesting was scheduled to begin this week. Reports of frost kill from Murtough indicated that this might affect the "harvesting" of late potatoes. Frost kills growth and hastens maturity.

So far, no price trends have developed for early potatoes. However, the first shipments appear to be good and about half the year's crop. Local potato buyers said it is too early to quote prices on product brought at this time.

Potato yield per acre for 1962 took a severe drop due to the freezing of the vines on last week-end, reports extension potato agent Virgil S. Cross. Reliable reports from the upper Snake and Blueham county areas show over 95 per cent kill with few fields, if any escaping the 27 to 22 degree temperatures. Farmers using sprinkler systems report vines freezing up and vines becoming ice coated.

Temperatures were not so low in the Paul, Rupert, Norland and Minidoka areas and a few fields escaped complete damage. The vine knock down was around 95 per cent in this area. A similar situation exists in the Malheur area with the exception of a few growers that irrigated every four to six rows with warm water.

Frost damage extended six to eight miles south of Burley with Golden Valley escaping without serious damage.

The shutting of the growing period at least a week by frost and the average of 10 days late on planting date plus low growing temperatures has resulted in a very definite curtailment in size, lowering yields.

Farmers contacted in the field by extension agent varied in the

Farmers Union Notes Rural Unrest, Doubts NFO Action

WASHINGTON, Sept. 14 (AP)—The National Farmers Union says the "huddling action" sponsored by the National Farmers organization dramatizes mounting unrest in rural America.

But the Farmers Union doesn't think the NFO strike action is the answer to the economic problems of the American farmer.

NFO began what it calls its huddling action—members holding their livestock and grain back from market. The move is an attempt to raise market prices and to force processors to bargain with farmers on prices.

The Farmers Union executive committee says the movement estimate of their yields compared to 1961 from 20 to 50 sacks per acre lower. Cross estimated the average yield for the acre at 180 sacks per acre or less.

33 Herds in Jerome Area Average High

JEROME, Sept. 14 — Of the 37 herds on test in the Gooding-Lincoln-Jerome Dairy Herd Improvement association testing unit number ten, 22 herds averaged more than 30 pounds of butterfat for the 31 days of August, according to Ben Huse, official tester.

The top herds included: Jack Edwards, Dietrich, with 24 registered and grade Holsteins, averaged 1,314 pounds of milk and 44.0 pounds of butterfat; Archie Malone, Jerome, with 35 registered Holsteins, averaged 1,232 pounds of milk and 43.0 pounds of butterfat; Frank Houston, Jerome, with 20 registered Holsteins, averaged 1,136 pounds of milk and 42.0 pounds of butterfat.

Bob Fuller, Jerome, with 27 registered and grade Holsteins, averaged 1,287 pounds of milk and 41.8 pounds of butterfat; Hugh and Henry Reid, Jerome, with 25 grade Holsteins, averaged 1,221 pounds of milk and 41.7 pounds of butterfat; Reed Taylor and sons, Wendell, with 23 registered and grade Holsteins, averaged 1,150 pounds of milk and 40.5 pounds of butterfat; Claude Bernard and sons, Wendell, with 14 registered Holsteins, averaged 1,251 pounds of milk and 40.1 pounds of butterfat.

Raeo Meyer, Hunt, with 17 grade Holsteins, averaged 1,131 pounds of milk and 39.0 pounds of butterfat; Clyde Kaserman, Hunt, with 20 grade Holsteins, averaged 1,183 pounds of milk and 38.0 pounds of butterfat; Charles W. Jones, with 16 registered and grade Holsteins, averaged 1,202 pounds of milk and 37.5 pounds of butterfat.

Norman Johnson, Hunt, with 20 registered and grade Holsteins, averaged 1,170 pounds of milk and 37.0 pounds of butterfat; Newton and Mrs. Charles, Wendell, with 27 registered and grade Holsteins, averaged 1,201 pounds of milk and 37.0 pounds of butterfat.

W. O. Priest, Jerome, with 20 registered and grade Holsteins, averaged 1,080 pounds of milk and 36.0 pounds of butterfat.

Paul Huch, J. & S., with 43 grade Holsteins, averaged 1,214 pounds of milk and 35.1 pounds of butterfat; Veri Hinson and daughter, Hamilton, with 22 registered and grade Holsteins, averaged 1,100 pounds of milk and 34.3 pounds of butterfat.

Orville Call, Hamilton, with 20 grade Holsteins, averaged 1,053 pounds of milk and 34.3 pounds of butterfat.

P. J. Supple, Jerome, with 31 registered and grade Holsteins, averaged 1,098 pounds of milk and 32.0 pounds of butterfat; Lyle P. Anderson, Jerome, with 30 registered Holsteins, averaged 970 pounds of milk and 31.7 pounds of butterfat; with three milkings daily, Gordon Hagler, Jerome, with 14 grade Holsteins, averaged 949 pounds of milk and 31.2 pounds of butterfat.

John L. Thompson, Jerome, with 17 mixed, averaged 774 pounds of milk and 31.1 pounds of butterfat; Larry Weigle, Jerome, with 21 grade Holsteins, averaged 945 pounds of milk and 30.1 pounds of butterfat; Gail Williams, Jerome, with 36 grade Holsteins, averaged 885 pounds of milk and 30.0 pounds of butterfat.

Lynn Burnham, Jerome, with 28 grade Holsteins, averaged 882 pounds of milk and 30.8 pounds of butterfat; Herman Hall, Jerome, with 17 grade Holsteins, averaged 828 pounds of milk and 30.5 pounds of butterfat.

Harvey Moser, Dietrich, with 11 registered Guernseys, averaged 838 pounds of milk and 34.0 pounds of butterfat; William L. Towns, Jr., Dietrich, with 33 grade Holsteins, averaged 819 pounds of milk and 34.0 pounds of butterfat; Dale Stoppel, Jerome, with 15 registered and grade Holsteins, averaged 818 pounds of milk and 33.3 pounds of butterfat.

Jack Nelson, Jerome, with 43 grade Holsteins, averaged 1,023 pounds of milk and 33.4 pounds of butterfat; George Best, Jerome, with 35 registered and grade Holsteins, averaged 1,023 pounds of milk and 33.4 pounds of butterfat.

VISITING with agriculture secretary, Orville Freeman, left, is the Soviet farm chief, Konstantin Gerasimovich Frayn. Accompanied by a party of Soviet agricultural experts, Frayn is in the United States on a tour. (AP wirephoto)

Grain Stubble Has Important Function, County Agent Says

JEROME, Sept. 14 — Grain stubble can perform two important functions in crop production. If it is returned to the soil and handled properly, W. O. Priest, Jerome county agent, advised farmers this week.

The first function is to provide bulk which opens up the soil and allows faster penetration of both the water and the air. All plants need limited amounts of air in the root zone and the loosening effect caused by straw allows this needed air to penetrate and remain in the soil.

The second function of straw is to furnish plant nutrients. Straw, plus enough nitrogen, is equal to its weight of good balanced manure in supplying plant nutrients. To release these nutrients the straw is broken down by a combination of bacterial action and water absorption.

The bacteria do the major part of the job and they need a source of nitrogen, air, moisture and a favorable temperature to carry out their function, Priest pointed out.

The straw does not contain enough nitrogen for rapid and complete bacterial breakdown. When 20 pounds of available nitrogen per ton of dry matter is added the bacteria do a complete job if conditions of soil, air, moisture and temperature are favorable, Priest said.

A 60-bushel crop of wheat will produce 100 pounds of dry matter in the straw and roots per bushel of grain. About half of this weight is removed under average conditions of shipping and selling. A 60-bushel crop of wheat straw needs 50 pounds of available nitrogen where all the straw is plowed under and 30 pounds where half is plowed under.

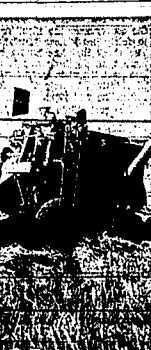

Jerome, with 35 registered Guernseys, averaged 846 pounds of milk and 32.0 pounds of butterfat; Phil McInturf, Eden, with 21 grade Holsteins, averaged 1,068 pounds of milk and 32.0 pounds of butterfat.

Sauter brothers, Jerome, with 52 grade Holsteins, averaged 993 pounds of milk and 33.0 pounds of butterfat; William T. Howard, Hamilton, with 20 registered and grade Holsteins, averaged 1,051 pounds of milk and 32.0 pounds of butterfat.

BUYS TURKEYS
WASHINGTON, Sept. 14 — The agriculture department has announced it will start purchasing turkeys in the near future to help stabilize prices to producers. The turkeys will be distributed to the national school lunch program.

SIMPLOT Phosphates Increase Profits

FROM FALL-SEEDED CROPS

Simplot Phosphate Fertilizers increase the yield and quality of most farm crops. Phosphate is especially important in winter wheat and other fall-seeded crops because of the quick start and stimulated root development that result.

When growing temperatures arrive in the Spring, your well-phosphated stand will be off to a profitable head start to yield more of better quality.

Simplot Triple Superphosphate, 0-45-0 now has three quality companion Ammonium Phosphates, 16-20-0, 11-48-0 and 10-48-0. Your Simplot dealer can help you choose an analysis and rate. See him soon.

Chemical Is Registered As Trademark

SAN FRANCISCO, Sept. 14 — The common name "naled" has been registered by the American Chemical Society in reference to the trademark name of an agricultural chemical developed by Orin division, California Chemical company, according to an announcement made by Leo R. Chandler, division manager, research and development.

Naled, an organo-phosphate chemical introduced in 1950, has had a wide acceptance among vegetable and fruit growers for its quick and effective kill of a wide variety of insect pests, and for its rapid disappearance, allowing for use close to harvest.

Naled also is effective against stored insect pests and has been registered for use in residential areas, municipalities, dairy barns, livestock pastures, feed lots and pastures where cattle are grazing.

Edison 14 concentrate, a formulation of naled, recently was registered for use by aircraft in the control of insects on a wide-scale control of nuisance pests.

Prices Dropping For Dairy Cows

WASHINGTON, Sept. 14 — The average price farmers receive for milk cows in 1962 will be well below the 1960 and 1961 levels, was the prediction of economic research service.

Prices during the first quarter of the year were maintained at about the \$224 per head level of last year, but declined to an average of \$219 in the second quarter. A further decline to \$217 was noted in June and July. Low demand for milk stock was attributed in part to poor pasture conditions and low supplies of roughage in North Atlantic and South Atlantic states.

Labor Effort to Organize Farm Worker Talk Topic

Farmers of Magic Valley as well as business and labor communities today were urged to attend the Monday, Sept. 18, session in Pocatello at which time W. B. Camp, nationally known farm leader, will talk.

Topic of his discussion at the dinner, planned for 120 p. m. in the American Legion hall, will be "Labor's place in the agricultural labor." His talk here is sponsored by the agricultural division of the Twin Falls Chamber of Commerce.

Long, a leader in California and the rest of the nation in retaining organized labor's efforts to unionize farm labor, is recognized as founder of cotton farming in the West Coast state.

Today Camp and his sons operate farms in California, Washington, Maine and South Carolina. Scholarships provided by the family have enabled more than 100 boys to study agriculture at Clemson college, South Carolina, and at other schools throughout the country.

"At the present time as treasurer of the Chamber of Commerce of the United States, he is termed an outstanding speaker by William Grange, manager of the local chamber."

As a boy, he grew up on a South Carolina farm which provided little more than subsistence. World war I saw him successfully launched into the farming career when he produced a long staple cotton especially suited for use in the airplane industry.

In announcing Camp's talk in Twin Falls Grange said that the dinner will be 12:30 p. m. with 50 cents of this amount going to aid in defraying the speaker's expense in making the trip.

"Members of the agriculture committee feel that the meeting is of vital concern to every farmer and businessman. The businessmen are urged to see that their farmer friends attend," Grange said.

September Is Good Time to Kill Weeds

BLOOMFIELD, Mich., Sept. 14.—September is the perfect time to control lawn weeds. They're still growing lustily, so will absorb the killing chemicals before a warm day, above 70 degrees, to do the job and you won't have to worry about weeds spoiling your lawn in spring.

Most broad-leaved weeds are readily killed by applying 4-D in granular form. The granular form is much safer to use near desirable plants as it is applied with a fertilizer spreader, therefore it cannot drift much on the wind.

It is true that results are not always perfect when granular 4-D is used, but they're close enough to that it's worth taking a chance of injuring your broad-leaved ornamentals by spraying.

Some weeds that are not readily killed by 4-D alone, such as annual 12, a combination of that chemical with its near relative, 2, 4-D-T, will do the trick. All you need to do is read the label on the package to see whether you're buying the combination or 2, 4-D-T alone.

Then there are the tough copperheads—stink clover, chickweed, and black medick. These are not even killed by the combination described above, but disappear shortly after 2, 4-D-T, also known as Silvex, is applied.

This last chemical is especially good against that pesky ironweed, Kentucky bluegrass lawn, which is quite a pest.

And last of all, there are the "diehards" that even 2, 4-D-T won't touch. An example of this group is the annual, and is called knotweed in one of these. Creeping veronica is another one. Both of these may be killed by judicious use of a product called Endothal.

When weedkillers are not available in granular form, take the precaution of shielding valuable plants with a cardboard screen while spraying near them. And be sure to keep your sweater for weed killers and weed killers only.

Jumper

HACKENSACK, Sept. 14.—Dec. Christensen, Hagerman, bought a Hereford bull to use in breeding cattle, and found the bull preferred jumping. The bull cleared a Christensen high coral fence, jumped into Snake river, bordering the Christensen fields on the west, and swam the width of the river, landing on the Brunette desert side. Since it was dusk and the trip around by road would make it too late to find him, they left the bull all night. In the morning they found him, and—now—keeping him in a large dog kennel with a wire top, as this seems to be the only thing that will hold him in, Christensen says.

Melon Harvest Season Hits Peak at King Hill Ranch

KING HILL, Sept. 14.—Peak of the melon harvest season has been reached at the Wesley-Pink ranch, four miles south of King Hill. Pink estimates 220 crates of cantaloupes have been harvested from his 10-acre patch. The melons, both watermelons and cantaloupes, have been trucked to Magic Valley towns, as well as Idaho Falls and Pocatello. Pink says the climate here is excellent for production of melons and potatoes, which he also raises along with other farm products. To raise good melons, Pink says, adequate irrigation and fertilization and careful crop management are needed. He uses 250 pounds of nitrogen phosphorus potassium to the acre and this gives him a yield of approximately 10 tons per acre. He feels the climate variety does the best in this area but he leaves the Idaho best cantaloupe variety to other growers. Pink says there is only one watermelon grower in the area and neither of them have any trouble selling their produce. Pink also raises early potatoes and tries to have them ready to truck to Magic Valley growers by mid-July. If weather conditions are right, for apples, he uses about 200 pounds of 10-20-20 fertilizer per acre. After the land has raised alfalfa, he plants the next year and melons the third year. The rancher also feeds cattle during the winter. This provides fertilizer necessary for the sandy soil. He also grows corn, grain and this year tried the new sorghum grain to see the yield. It is looking it to his stock. Pink's son, Donnie, in his father's "right hand man" and Mrs. Pink also helps with the farming operation.

Cattle Are Moved From Grazing Land

SHOONHOUT, Sept. 14.—Thorn Creek cattle association members have moved their Hereford cattle this week from the Taylor grazing land to their desired range land. The desired land consists of about 7,000 acres. The association has about 11 members and approximately 8,000 head of cattle. It was reported earlier that the remainder of the year likely will be only moderately lower than in the same period of 1961. Per capita consumption of turkey for all of 1962 is expected to be down about four per cent from last year's total of 73 pounds.

Slump Noted in Turkey Supply

WASHINGTON, Sept. 14.—The agricultural marketing service said supplies of turkey during the marketing season—September–December—may be down only about eight per cent from a year earlier. The prediction was made in spite of the fact that 15 per cent fewer turkeys are expected to be produced for the year as a whole. Most of the reduction in turkey production occurred by Sept. 1, when the total number of turkeys produced was down about four per cent from a year earlier.

took about four days to complete the job, begun Monday. Arrangements for the move were made by the director, Fredrickson, Gooding, County Shoshone, and an employee, Harry Patterson, northeast of Gooding. At a corresponding time, ranchers at the east end of the area took their cattle home. The entire group of 20 camp made up the Shoshone Unit cattle association. The users report cattle had been especially good this year and they were granted an extension of 30 days grazing rights. The Thorn Creek Cattle Association members will bring their cattle home from the leased land about Oct. 1. BUY TIMES-NEWS WANT AD FOR FAST SELLING RESULTS

Beef Slaughter Figures Lower

WASHINGTON, Sept. 14.—Federal cattle slaughter under veterinary inspection was estimated by the U.S. department of agriculture at 406,000 head for the third week in August, two per cent below the 415,000 figure for the previous week, but four per cent above the corresponding week in 1961.

Beef production was 2084 million pounds—compared with 2311 million pounds a year ago. Calf and veal slaughter was placed at 90,000 head for the third week as the preceding week, and compared with 102,000 for last year.
